6) דָּג *	fish	

\* We shall learn the dagesh (“dots”) in a later lesson.

## 2.03 supplement *Hebrew syllables*

### *Guidelines for syllables:*

1. Every Hebrew syllable begins with a consonant and a vowel. (Note: in Hebrew, syllables cannot begin with a vowel/nikkud.)
2. Hebrew has two types of syllables: open and closed.
  - a. Open syllables end with a vowel.
  - b. Closed syllables end with a consonant.
  - c. Example:
 

כַּחֵץ has two syllables כַּח & חֵץ .

The first syllable is כַּח. It is open because it ends with vowel kamats.

The second syllable is חֵץ. It is closed because it ends with the consonant vet.
3. Easy way to identify how many syllables are in a word – count the number of vowels.
  - a. The number of vowels in the word equals the number of syllables. (Note: each syllable must begin with a consonant and have a vowel.)
  - b. A simply way to indicate the type of syllables:
 

“O” = an open syllable  
 “C” = a closed syllable

## 2.04 supplement *Exercise & answers to identifying syllables*

<i>Exercise: Identify the number &amp; types of syllables</i>					
<b>Hebrew</b>	<b>Translation</b>	<b>Transliteration</b> Read before looking at transliteration	<b>Number of syllables</b>	<b>Write each word with syllables</b>	<b>Indicate type of syllables</b> (remember Hebrew is read right to left; use the right to left order when notating the syllables below) C = closed syllable, ends with a consonant O = open syllable, ends with a vowel
